

Erdem Korkmaz

Frontend & Mobile App Developer

Frontend-focused software developer with hands-on experience in **Vue.js**, **React.js**, **WebSocket-based** real-time systems, and **AI-driven anomaly detection**. Currently developing large-scale real-time monitoring dashboards and intelligent alert systems at Enekom. Skilled at crafting dynamic, **responsive & reactive UIs** and bridging frontend logic with backend data streams.

SKILLS

- Vue.js
- React.js
- JavaScript (ES6+)
- HTML / CSS / Tailwind
- WebSocket & Real-time Systems
- Python (AI Integration)
- PyTorch / TensorFlow
- Flutter & Dart
- Git / Linux

CONTACT

WORK EXPERIENCE

Software Developer

Enekom
10/2023 - Present

- Developed real-time anomaly detection dashboards using **Vue.js**, **React.js**, **HTML**, **CSS** and **WebSocket** for continuous rail-health monitoring.
- Integrated **AI-based image processing** pipelines for defect detection using **PyTorch** and **TensorFlow**, ensuring live synchronization between edge devices and web clients.

- Collaborated with backend and data teams to deliver performant, **maintainable** UI architectures optimized for streaming data and **real-time alerts**. Additionally contributed to mobile modules (**Flutter**, **Dart**) for varying solutions.

EDUCATION

Atılım University

Licence in Computer Engineering | June 2023

- For capstone project; I have developed a mobile application for group expense splitting, leveraging **OCR** techniques with **Tesseract** and image processing algorithms to extract text from receipts for accurate and efficient cost allocation.

TRAINING

AI Coding, Machine Learning

Altın Kariyer Academy | 01/2024-05/2024

Drone Building, Image Processing

Altın Kariyer Academy | 03/2024-07/2024

C#, Object Oriented Programming

Vektorel Bilişim | 06/2019-05/2019
